Information About The Service

uConnected allows subscribers to divert calls from a landline, 1300 number or 1800 number to an Australian phone number within a scheduled time. It functions as a prepaid call forwarding service. For calls to forward and services to remain active, subscribers must pay for their service monthly in advance, or earlier than monthly if 100% of their included minutes are consumed. Subscribers can choose a new number or bring their own.

Additionally, subscribers with compatible devices can use the uConnected mobile app for outbound calling.

Auto Top Ups/Auto Recharging

uConnected will automatically top up/recharge your service in two scenarios, whichever happens first:

2. When 100% of the included minutes are consumed prior to the monthly renewal date

The auto top up functionality can be managed or disabled using the uConnected mobile app or at uconnected.com.au. Services that do not get topped up with additional minutes become suspended, and are not usable. Subscribers must maintain an available minutes balance for the service to remain connected. Various top up/recharge options are available to choose from.

Overseas Usage

uConnected may be unable to forward calls when the endpoint phone is outside of Australia, without reception or otherwise unreachable. If the endpoint mobile is unreachable, calls will instead forward to uConnected voicemail (if enabled by the subscriber), with messages left being delivered via email. Calls forwarded to Australian mobiles being used overseas may incur additional costs from the device's carrier.
